Subject: AN/UDR-13 Pocket Radiac Solicitation No. W15P7T-04-B-k257

Reference: Canberra Proposal

Dear Gentlemen,

Canberra is pleased to submit the included technical proposal (one paper copy and one electronic copy) in response to Solicitation No. W15P7T-04-B-K257. As evidenced by the information provided in this proposal and the on-going, successful eight-year production run of the AN/UDR-13, we feel strongly that Canberra is most qualified to continue efforts associated with the U.S. Military's Pocket Radiac Program. Furthermore, Canberra has also conducted several similar projects over the recent past in an equally successful and demonstrably satisfactory manner.

We fully understand that upon successful completion of the Step One Phase Canberra may be asked to submit a sealed price bid for further evaluation by your office. At this time we will be prepared to submit a cost proposal for the Step Two Phase.

Canberra sincerely appreciates the opportunity to submit our proposal. Should any additional information or classification be required – please contact the undersigned.

Sincerely,

Harold J. Cooley
Senior Vice President
